

We do more than build buildings.
We're building *solutions.*

INSTITUTIONAL – COMMUNITY

CHRIST LUTHERAN SCHOOL

PORT SAINT LUCIE

Scope and Responsibilities:

Christ Lutheran School first reached out to Richard K. Davis Construction Corporation (RKDCC) in 2014 to build the first of two classroom buildings. The existing church campus had little to no infrastructure and so site improvements for parking, utilities, and stormwater collection were designed to bring the entire site up to current requirements. In 2022, Christ Lutheran came back to RKDCC's **Design/Build** services because of our proven quality of workmanship and commitment to timeliness. At first both buildings were designed to be identical, but over the course of eight years the school needed to maximize the site to accommodate a growing student body and create a distinguished centerpiece to the campus. The addition of a 24-foot-high masonry tower to the second building helped them achieve both goals. The second classroom/administrative building allowed Christ Lutheran School to teach their students from elementary school all the way through high school. Achieving quality workmanship and meeting timelines in both phases were possible due to RKDCC typical hands-on **self-performance**. In conjunction with an architectural showcase structure for the phase two classroom/administrative building, the provision of quality private education continues to thrive in the PSL community.

Date of completion:

August 2015 / January 2023

Total square footage:

4,982 Classroom Building
6,224 Classroom Building

Contact:

Christopher Dale

Assistant Pastor / Principal

Keith Duin

Building Committee Treasurer

"The staff of office workers and people in the field were reliable, hard-working, and easy to work with. If you are looking for a builder with integrity, honesty, knowledge, experience, and a hard-working reliable crew, I recommend you contact Richard K. Davis Construction Corporation."
