

We do more than building buildings.
We're building *solutions.*

MANUFACTURING

BEE ELECTRONICS

FORT PIERCE

Scope and Responsibilities:

When Bee Electronics moved its electronics case manufacturing business to new quarters, they chose Richard K. Davis Construction Corporation to handle the design and construction of their new manufacturing facility in Florida. Working with the architect and civil engineer, we developed a custom **Butler® Building** design to house the company's operations and sales offices, computerized design department, and manufacturing space for four product lines.

Date of completion:
December 1999

Total square footage:
60,988 Building
