

We do more than building buildings.
We're building *solutions.*

PROFESSIONAL OFFICE – MEDICAL

DERMODY PEDIATRIC DENTISTRY AND ORTHODONTICS

ST. LUCIE WEST

Scope and Responsibilities:

When Dr. Rachelle Dermody sought a contractor to construct a custom designed tenant building and pediatric dental office, she looked primarily for someone she could trust and that would provide her with a quality job. Those credentials were easily matched by Richard K. Davis Construction Corporation. Dr. Dermody's project entailed overseeing final design, permitting and construction of a six bay tenant building along with a 4,060 s.f. of high-end dental office for the doctor's family practice using a child friendly camping theme throughout their pediatric office. Lots of stained wood paneling, trims and stonework offer a natural backdrop for canoes, teepees, trees and even a black bear, all enhancing the feel of being in the great outdoors. Davis Construction also oversaw and coordinated the installation of more technical elements of typical medical offices such as medical gases, x-ray equipment and examination chairs.

Date of completion:

May 2007

Total square footage:

9,660 Building
