

We do more than building buildings.
We're building *solutions.*

SELF STORAGE

ST. JAMES STORAGE

PORT ST. LUCIE

Scope and Responsibilities:

As if satisfying the City of Port St. Lucie's architectural standards for this prominent location at the intersection of Airoso Boulevard and St. James Drive wasn't enough, we broke ground on this project just as hurricanes Jeanne and Frances made direct hits on the region. Using our **Design/Build Service** allowed St. James Storage to "weather the storm" and resulted in a satisfied client.

Date of completion:

January 2007

Total square footage:

41,131

Contact:

Jerry James

Owner

"I want to express my deep appreciation for helping reconcile our problems. In a very difficult situation, you stood tall and are a unique, strong and very good man."

Design Partners:

Paul E. Welch

Architect

Fricia Engineering

Civil Engineer

William H. Flint III

Landscape Architect
