

We do more than building buildings.
We're building *solutions.*

INDUSTRIAL

SUN AVIATION, INC.

VERO BEACH

Scope and Responsibilities:

After the one two punches of hurricanes Jeanne and Francis, Sun Aviation chose the **Design/Build Service** of Richard K. Davis Construction to rebuild their damaged aircraft storage hangar. We relied on the strength of our client relationship with **Butler Manufacturing Company**, their franchised Treasure Coast representative, to structurally redesign the building to current codes and increase the interior clear height to accommodate storage of aircraft up to G4 capacity. We coordinated local structural design issues to upgrade foundations, installation of an enlarged horizontal sliding hangar door and fire safety requirements to the satisfaction of Indian River County, the City of Vero Beach, and the National Fire Protection Agency. **Self performance** of all concrete and steel erection with our own qualified tradesmen clinched the relation of a repeat client.

Date of completion:

July 2006

Total square footage:

21,250 Building

Contact:

Peter Holman

Operations Manager

"In my opinion, your Project Management staff and field supervision is your company's greatest asset. Thank you for a job well done on the construction of our Avionics hangar."
