

We do more than building buildings.  
We're building *solutions.*

AGRICULTURAL – BUSINESS

## SUNBRITE CITRUS, INC.

FORT PIERCE

### Scope and Responsibilities:

After almost five years in operation, SunBrite Citrus – part of Schirard Citrus – needed larger quarters for its citrus packing and sales operations. Working with the **Design/Build Service** of Richard K. Davis Construction Corporation, the company planned a facility that included a state-of-the-art 63,000 square foot packing facility, utilizing **Butler® Manufacturing's** pre-engineered structural and roof systems in conjunction with an attractive two-story conventional office/sales facility on its prominent Orange Avenue road frontage. With the owner, architect and civil engineer, we completed the unique project in time for SunBrite to move into its new space before the beginning of the 1993 citrus harvest season.

### Date of completion:

September 1993

### Total square footage:

72,000

### Contact:

**Brantley Schirard**

*President*

"Your entire staff is to be commended for their specific job performances and concerns over our timing constraints throughout the project."

### Design Partners:

**Linden Pettys**

*Architect*

**Culpepper and Terpening, Inc.**

*Civil Engineer*
