

We do more than building buildings.
We're building *solutions.*

SUNRISE FORD COMPANY

FORT PIERCE

Scope and Responsibilities:

Due to a strong relationship established by the successful completion of the original dealership in 1995, Richard K Davis Construction Corporation was invited back as a design consultant and hired as general contractor in 2008 to implement the owner's unique vision to modernize the dated look of her new and used car showrooms. The architecture took on its own distinctive look with a serpentine façade flanked by two cylinder showroom towers of varying diameters and heights, all clad in metallic paneling and setting a new standard for appearance among Treasure Coast dealerships.

With the initiative of Sunrise Ford's president, a photovoltaic system was installed on the standing seam metal roof, harnessing enough of the sun's energy to electrify her entire showroom and with the use of a metered grid-tie inverter, regularly feeds excess energy back into Florida Power and Light's power grid. Sunrise Ford has become recognized as a pioneer in "Green" technologies through their investments.

Date of completion:

May 2009

Total square footage:

6,314 building
1,239 covered walk

Contact:

Mary Jo Tierney
President

"Our decision to continue investing locally by contracting with Richard K. Davis Construction has once again proven our trust that quality workmanship and fulfilled commitments can be found without leaving the Treasure Coast"

Design Partners:

Cook and Menard Architecture
Architect

Paul Welch Engineering, Inc.
Civil Engineer
