

We do more than building buildings.
We're building *solutions.*

INSTITUTIONAL – WORSHIP

WESTSIDE BAPTIST CHURCH

FORT PIERCE

Scope and Responsibilities:

Westside Baptist Church returned for the fourth time to the entrusted design and construction services of Richard K. Davis Construction Corporation (RKDCC) with the most ambitious project in the development of the 48 acre campus, a state of the art 1740 seat sanctuary.

After having entertained a number of proposals from nationally recognized church builders that were unable to maintain a fixed cost budget during design, RKDCC's realistic cost budgeting and design consultation successfully incorporated the economics of **Butler® Manufacturing's** pre-engineered metal building and roofing systems, balancing the church's aesthetic intent with a cost budget that remained stable.

By integrating the conventional design elements of stuccoed concrete block and the signature blue standing seam metal roof of the existing campus, the new sanctuary created the properties new prominent focal feature while perfectly harmonizing with all other site structures.

Date of Completion/Square Footage:

2009/54,878 Sanctuary & Admin. Offices

2000/8,703 Family Life Center Gymnasium

1995/7,543 Classroom Building

1991/17,372 Original Sanctuary/Classrooms

Contact:

Dr. Dale K. Ingersoll

Pastor

"We involved Davis early in the design of our projects, making many design changes based on their recommendation that were significant cost savings. They have the expertise to deal with the architects, structural, landscape, environmental and civil engineers."

Design Partners:

Glenn Pate Associates, P.A. AIA

Architect

Stephen Cooper, P.E. & Associates

Civil Engineer

Conceptual Design Group, Inc.

Landscape Architect
