

We do more than building buildings.
We're building *solutions.*

PROFESSIONAL EXPERIENCE

BRIAN McLAM, PROJECT MANAGER

Brian McLam first started in construction with Drawdy Brothers Construction, gaining valuable experience in the areas of concrete, masonry and tilt-wall construction. Starting out in the field, he gained hands on experience by building concrete formwork, tying reinforcing steel and placing and finishing concrete. Being recognized for his skill and knowledge of the trade, Brian became a job site foreman responsible for managing the field crews adherence to the structural designs and acquisition of materials. Brian continued to move forward in his career when he advanced into the administrative responsibilities of estimating, pre-construction services, and negotiating contracts. He successfully helped manage many projects throughout the Treasure Coast including Fort Pierce Central High School, Renaissance

on the River, and The Fort Pierce Clerk of Courts to name a few. Brian is a very devoted family man to his wife and very active two children. In his down time he enjoys boating and spending time on the Indian River Lagoon. Brian started with Richard K. Davis Construction Corporation in 2013 and we look forward to him being a fundamental part of our company.

Prominent Project Experience:

- Fort Pierce Central High School**
